

Caisse des Depots et Consignations

Key Rating Drivers

Rating Derivation Summary: Fitch Ratings views Caisse des Depots et Consignations (CDC) as a government-related entity (GRE) of the French state (AA/Negative) and equalises its ratings with those of the sovereign. This reflects the very strong links between CDC and the state and the very strong incentives for the latter to support CDC if needed, resulting in an overall score of 55 points under our GRE rating criteria. The Negative Outlook reflects that of the state.

Status, Ownership, and Control – ‘Very Strong’: CDC has the status of special public agency (‘etablissement special’, a type of ‘etablissements publics’), which is unique in France. Should it be dissolved, all its assets and liabilities would be transferred to the state or another public entity designated by the state. The state exercises tight control over CDC’s strategic decisions through the parliament and the presence of representatives on the supervisory board.

Support Track Record – ‘Strong’: As an ‘etablissement public’, CDC would have access to emergency liquidity support mechanisms in case of need. It has not needed any extraordinary state support in the past. The unconsolidated Saving Fund division benefits also from a state guarantee on the regulated savings and of guarantees from LRGs on the loans granted. There are no legal or regulatory restrictions on support.

Socio-Political Implications of Default – ‘Very Strong’: CDC has a highly strategic role for the French state as it is mandated to perform various public interest missions in key government policies. CDC’s total assets represent 44% of France’s GDP at end-2020.

CDC also acts as a long-term investor to support local and sustainable development, manages French legal deposits and administers major public pension schemes and regulated saving funds. In Fitch’s view, a default would endanger the continued provision of essential public services, with significant political and social implications.

Financial Implications of Default – ‘Very Strong’: Fitch views CDC as a proxy funding vehicle for the state as its borrowing conditions are very close to the Sovereign’s. CDC is a large and regular issuer in both national and international markets with its EUR18.5 billion EMTN, EUR1.5 billion Neu MTN, EUR20 billion Neu CP and EUR30 billion global CP programmes. In Fitch’s view, a default by CDC would have large impact on the sovereign’s credit standing and on the borrowing capacity of other French GREs.

Operations: The CDC group materially changed in 2020 with the integration of the group La Poste and of SFI. Its total assets increased six-fold to reach EUR1,015 billion. On a holding basis (General Section), CDC’s balance sheet increased 5% in 2020 to EUR147 billion, driven by an increase in loans to the saving fund division and by the acquisition. The holding’s net banking income dropped by 44% in 2020 due to the reduction in dividend income as the activity of many of its participations fell due to the pandemic. Net income fell 76% in 2020 at the holding level.

ESG Considerations: The ESG credit relevant score is ‘3’, meaning that ESG issues are credit neutral on CDC’s ratings.

Rating Sensitivities

Sovereign Rating: A rating action on the sovereign’s ratings would be reflected in those of CDC.

Weaker Assessment: A downgrade could result from weaker assessment of support leading to a score below ‘45’ points under our GRE criteria.

Rating Synopsis

Fitch views CDC as a GRE of the French state and assigns a score of 55 to the entity under its GRE rating criteria. This reflects a 'Very Strong' assessment on three rating factors (Status, Ownership and Control, Socio-Political Implications, and Financial Implications of Default) and a 'Strong' assessment on Support Track Record and Expectations. The GRE score of 55 leads to an equalisation of CDC's ratings with those of the sovereign. The Negative Outlook reflects that of the French state.

Issuer Profile

Created in 1816, CDC is a French public special entity with a highly protected legal status. CDC is supervised by the French parliament. It acts as a long-term institutional investor and performs various public interest missions granted by the law, such as the financing of infrastructure projects, universities and renewable energy contributing to local and sustainable economic development.

Assessment of Support

Caisse des Dépôts et Consignations – Assessment of Support

Status, ownership, and control	Support track record	Socio-political implications of default	Financial implications of default	GRE score
Very Strong	Strong	Very Strong	Very Strong	55

Source: Fitch Ratings

Status, Ownership and Control: Very Strong

CDC has the status of special public agency ('établissement special', a type of 'établissements publics'), which is unique in France. CDC's legal status is defined by the monetary and financial

code (article L-518) and can only be modified by law. The status provides CDC with immunity to liquidation and bankruptcy law (article L 631-2 and L640-2 under the French commercial code) and decisions relative to its dissolution would revert to the French state.

CDC is closely monitored by the state. It is under the supervision of the French parliament under the French monetary and financial code. CDC's CEO is appointed by the French president for a five-year term and a majority of its supervisory board comprises members of parliament and representatives.

In accordance with the PACTE Law (Plan d'Action pour la Croissance et la Transformation des Entreprises) of May 2019, CDC's supervisory board became a deliberative body with strengthened prerogatives on CDC's strategic positioning and its subsidiaries, the implementation of its public interest mandates, investment strategy and financial situation. The law ensures the pre-eminence of parliamentarians in CDC's supervisory board and close monitoring by the French parliament. It also provides that the French banking regulator, ACPR, will supervise CDC from 2020 under a framework that takes into account CDC's specificities.

Support Track Record: Strong

As an établissement public, CDC would have access to the state's emergency liquidity support mechanisms, such as emergency loans or the purchase by the French treasury of CDC's long-term bonds or short-term notes issued by CDC through its general division. However, it has not needed any extraordinary state support over recent decades due to its strong financial profile, leading Fitch to cap the assessment for this factor at 'Strong' as per its Government-Related Entities Rating Criteria.

Fitch considers that the state is liable for the debt of its 'établissements publics', including CDC, under the Law of July 1980 (n° 80-539) on French public establishments. Fitch believes that the Law of 1980 is not tantamount to a first-demand guarantee but constitutes another form of support to EPs (see [What Investors Wants to Know: The Status of EPs Is not Tantamount to a Guarantee](#)).

One of CDC's key mandate under its Saving Fund division is to centralise, custody and manage the funds collected in tax-exempt savings deposits by French banks, notably 'Livret A'. Those funds, which amounted to EUR284 billion at end-2020, benefit from a full, unconditional and irrevocable state guarantee, while the loans granted to social housing providers are largely guaranteed by French LRGs.

Given CDC's core activities, Fitch does not believe that there is a risk of state support being considered as illegal state aid. In Fitch's view, there is no legal or regulatory restriction on support.

Socio-Political Implications of Default: Very Strong

In Fitch's view, a default of CDC would endanger the continued provision of essential public services with significant political and social implications. CDC has a highly strategic role for the French state as it is mandated to perform various public interest missions in key government policies (environment, social housing development, local government financing, infrastructure and transportation). CDC's mandates also include the protection of legal deposits, the administration of major public pension schemes and regulated saving funds, and the management of unclaimed accounts held by the French banks. It is also the institutional bank of Agence Centrale des Organismes de Sécurité Sociale (ACOSS) (AA/Negative/F1+), the French social security agency.

Fitch believes the EUR26 billion recovery plan established by CDC in May 2020 to sustain the French economy in response to the coronavirus pandemic confirms its key role for the state. This major investment plan will be implemented rapidly (50% was implemented by end-October 2021), of which EUR11 billion will be for housing, EUR8 billion for enterprises (notably in distressed sectors such as tourism and trade), EUR6 billion for the climate and EUR0.5 billion for social cohesion.

A default by CDC at the holding level would directly endanger the completion of this very large recovery plan, and would also threaten its ability to extend loans to social housing provider. Although this activity is backed by the unconsolidated Savings Fund, the Savings Fund has been

increasingly borrowing from the holding over the past decade to finance the social housing sector as part of CDC's dedicated investment plan for housing.

In addition, CDC holds strategic subsidiaries whose default would have significant socio-political implications for the state, such as EPIC Bpifrance (AA/Negative), the government arm for financing French SMEs and guaranteeing export finance contracts, La Poste (A+/Stable), the French postal operator, and SFIL, the public development bank for French LRGs and public hospitals.

Fitch also views CDC's majority shareholding in La Poste since March 2020, so as to create a major public financial group, as further evidence of CDC's key role for the state. CDC has become the majority shareholder of LP at 66% (versus 34% for the state), in return for its 40.9% stake in CNP Assurances to La Banque Postale S.A. (LBP; A/Stable) and its acquisition of a EUR1 billion stake in La Poste from the state. At end-September 2020, following CDC's increased stake in La Poste, CDC also took over 99.99% of Société de Financement Local (SFIL) (from an initial 20% stake for CDC, 75% for the state and 5% for LBP). The state retained one ordinary share. As a result, at end-2020 CDC's consolidated balance sheet represented about 44% of French GDP.

Considering CDC's key role in many aspects of the French economic life, Fitch considers there is no potential substitute were CDC not able to perform its missions.

Financial Implications of Default: Very Strong

CDC is a proxy funding vehicle for the French state, performing numerous mandatory state financial missions. Fitch considers a financial default by CDC would have a large impact on the French state's credit standing and on the borrowing capacity of other French GREs (especially établissements publics) as it would erode investors' confidence in the willingness of the state to support these entities. A default would also significantly disrupt social housing financing and pension fund management.

CDC is a large and regular issuer in both national and international markets with its EUR18.5 billion EMTN programme (EUR15.5 billion outstanding at end-June 2021), EUR1.5 billion Neu MTN programme (EUR0.7 billion outstanding), EUR20 billion Neu CP programme and EUR30 billion Global CP programme (ECP and USCP). CDC also issued a EUR500 million green bond in 2017, and since 2019 has been issuing EUR500 million of sustainable bonds per year.

Overall GRE Assessment

The assessment of the above rating factors leads to a score of 55 under our GRE rating criteria.

Operations

CDC performs various public general interest missions. Some of its activities are consolidated (protection of legal deposits, financing of local and sustainable development, regulated banking, strategic shareholdings), while other activities carried out on behalf of the French state are not consolidated (management of savings deposit funds and administration of major public pension schemes).

Consolidated Activities

Protection of Legal Deposits

CDC is the institutional manager of legal deposits, which comprise over 20 monopolies by law involving legal depositary of specific private funds for protection. CDC centralises and takes custody of deposits linked to legal procedures under the control of specialised public appointees, consignations in case of disagreement between parties, dormant bank accounts and unclaimed life insurance.

Local Development Long-Term Investments

CDC finances local government projects by providing equity financing for infrastructure, universities, renewable energy and high-broadband network programmes. In addition, CDC supports new businesses and local job-creation schemes and provides private equity financing to SMEs. CDC is engaged in infrastructure finance through long-term public interest projects, and partly through public-private partnerships (PPPs).

Social Security Support

CDC acts as the institutional bank of ACOSS, a public agency in charge of the social security scheme's cash operations and the financing of short-term deficits accumulated by social security branches. ACOSS's funding is based on a EUR70 billion NeuCP programme, a EUR70 billion ECP programme, and different liquidity instruments provided by CDC totalling EUR21 billion in 2020 – up from EUR11 billion set under the 2019–2023 funding contract (EUR7 billion of three- to six-month loans and EUR4 billion of very short-term loans). CDC provided this exceptional EUR10 billion in 2020 to support ACOSS by purchasing its NeuCP issues in response to the coronavirus pandemic. These NeuCP issues have since been paid back.

Affiliates and Strategic Shareholdings

CDC Group holds shares in a number of strategic entities in banking and insurance, housing, infrastructure, transportation, energy and environment. Since the integration of La Poste in March 2020, they have been organised into five business units: La Poste Group, Banque des Territoires, Bpifrance, Strategic Shareholdings and Asset Management.

La Poste Group

Since the PACTE law, the state is no longer a mandatory shareholder of La Poste. However, La Poste must be fully owned by public-sector entities under the French postal law (Act 2010-123, 9 February 2010). As a result, CDC became the majority shareholder of La Poste on 4 March 2020 by taking over 66% of the latter (up from 26.3%), in return for giving a 40.9% stake in CNP Assurances (one of the France's largest life insurance and term creditor insurance providers) to LBP. As of end-June 2020, La Poste Group comprised LBP (which in turn owned 63% of CNP Assurances), GeoPost and other industrial and commercial services (e.g. 'colis' services).

As part of the creation of a major public financial group with the merger of CNP Assurances and LBP, CDC also took over 99.99% of SFIL at end-September 2020. SFIL is a financial institution providing funding to French local and regional governments and public hospitals.

Banque des Territoires

Created in May 2018, Banque des Territoires is a unique platform that aims to support social housing, local and sustainable development in French territories. It is the intermediary between the Saving Funds, the General Section and a few other entities, and public sector borrowers.

Within this business unit, CDC fully owns SCET (Services, Conseil, Expertises and Territoires), a company providing financial engineering and advisory services to local governments and social housing entities, and CDC Habitat (AA-/Negative), which is one of the largest social housing landlords in France with a portfolio of about 526,000 units at end-2020.

Bpifrance

CDC owns equal shareholdings (49.2%) with EPIC Bpifrance (fully owned by the state) in Bpifrance, a development bank created to more efficiently provide funding for technological innovation, SMEs, and mid-caps by combining the services previously provided by OSEO, CDC Entreprises and the FSI (Strategic Investment Fund).

In December 2018, CDC International Capital, CDC's subsidiary specialised in long-term relations with sovereign funds to co-invest in operations in France and internationally, was transferred to Bpifrance. The absorption of CDC International Capital by Bpifrance aims to rationalise services provided by CDC and Bpifrance to support companies' capital growth.

Strategic Shareholdings

At end-June 2021, CDC held majority shares in real-estate and tourism entities, including ICADE (39%) and CDA (39%). It owned 76% of EGIS, an international engineering service company, 83% of STOA, a company specialised in investing in long-term infrastructure projects, 33% of HIG GRT Gaz, a leader in gas transportation, and 66% of Transdev Group for sustainable transport. As of January 2019, Rethmann Group held the 30% of Transdev's shares previously owned by Veolia Environnement S.A. CDC also owns 30% of CTE.

Asset Management

CDC also acts as an asset manager through its subsidiaries CDC Croissance (100%), CDC PME Croissance (53%), CDC EURO Croissance (50%), CDC TECH Croissance (36%) and several real-estate subsidiaries managed by CDC Investissement Immobilier.

Non-Consolidated Activities**Management of Saving Funds**

CDC acts as the custodian and manager of the funds collected in tax-exempt savings deposits by the French banks, mainly Livret A. These funds have a full state guarantee. Total savings deposits increased to EUR284 billion at end-2020 (end-2019: EUR261 billion).

Most of these funds are used to finance French social housing entities. Livret A-backed loans generated by CDC are the main source of funding for the French social housing sector, representing about 75% of their total financial debt at end-2019. While loans granted to the social housing sector have been growing by 3.8% a year on average since 2013, deposits on Livret A have only been growing by 2.5%. When excluding the spike in savings rates in 2020 due to the pandemic, this figure is just 1.5%.

As a result, the Saving Fund section has increasingly been borrowing from the General Section. This does not represent a risk for the General Section as loans granted by the Saving Funds benefit from first demand guarantees from LRGs and, to a lesser extent, from the social housing sector's guarantee fund (CGLLS).

Administration of Retirement Schemes

CDC administers a large number of public retirement schemes, covering over one in five retirees in France, with about 9.7 million contributors and 4.1 million pensioners in 2020. This represented EUR63 billion of contributions and EUR59 billion pensions paid in 2019. These retirement savings plans are mostly pay-as-you-go schemes. CDC is responsible for collecting contributions, calculating rights and paying out pensions. The activity is managed in such a way as to break even and it is not a profit centre for CDC.

Financial Performance

Financial Profile

Negative Impact of the Pandemic in 2020

CDC's net banking income reduced by 44% at the holding level in 2020 to EUR1,521 million (2019: EUR2,731 million). This reduction was mostly due to a sharp drop in dividend income received from its associates (-48%), some of which had been particularly affected by the crisis. Net interest margin, on the other hand, improved by 12% in 2020 to EUR424 million, the cost of funding having dropped more than interest income.

However, the sustainably low rate environment is gradually depleting CDC's net interest margin. This gradually declined to a low EUR377 million in 2019 (2013: EUR806 million) before a slight rebound to EUR424 million in 2020. This also reflects the pressure from the CDC's remuneration of the legal deposits held from notaries and other legal professions, set at 0.3% since July 2020. Thus, the net interest margin went from representing 50% of CDC's net banking income to less than 30% (2020: 28%), while dividend income from participations is increasing. This makes the General Division more sensitive to the volatility of the capital markets.

The integration of the La Poste Groupe will also increase the dependence of CDC on dividends from this single business unit. Fitch views the concentration risk for CDC as limited due to the La Poste Groupe's diversified activities and high credit rating of 'A+' / Stable.

Operating expenditures were also down 21% in 2020. This led to an increase in the operating ratio to 35%, from a stable 26% on average over 2013–2019. Operating expenditures remain overall stable, hovering between EUR500 million and EUR600 million a year.

The cost of risk is low at EUR68 million, despite it having increased ten-fold since last year. This led to a net income of EUR481 million, compared with EUR1,200 million on average in the previous years.

At the consolidated level, net income was also down 82% to EUR410 million. All business units contributed to this reduction. CDC pays the state a quasi-dividend equal to 50% of its consolidated net income each year. The amount is set every year by a decree.

Capital Structure Remains Solid

At the holding level the capital structure is solid, with an 'equity-to-assets' ratio consistently above 15%. As a public law entity CDC does not have share capital: its equity consists of the reserves accumulated over the years. CDC's return on equity declines to 2.1% in 2020, while averaging a solid 6% over 2013–2019.

CDC's main source of funding remains the legal deposits it is entitled to as part of its custodian role. These include deposits from notaries and other legal professions, as well as unclaimed bank accounts and life insurance funds. They have been increasing by 5.4% a year on average, with a 6.7% jump in 2020, and their share of total assets increased from 34% in 2013 to 42% in 2020. These funds, notably the notaries' deposits, are closely correlated to the real-estate market. As such, they can decline in case of slowdown in real-estate transactions, as was the case in 2008 and 2009. The rate of remuneration for these deposits has been 0.3% per year since July 2020 (down from 0.75%), making them quite expensive in the current low-rate environment.

The potential volatility of the deposits is compensated by CDC's access to the capital market through its different issuance programmes. Financial debt represented less than half of CDC's balance sheet at end-2020. Before 2016 it had represented over half. This fall was due to the growing legal deposits.

The capital structure at the consolidated level materially changed in 2020 with the integration of the La Poste group. The 'equity-to-assets' ratio declined to 6% in 2020 from 25% in 2019, the newly integrated entity being more reliant on financial debt.

Prudent Risk Management

As of 2020, the PACTE law ensures that CDC will report to the French banking regulator (ACPR) under a framework that will take into account its specificities as a long-term investor. CDC created an internal risk-management division, which aims to ensure consistency with ACPR regulation, promoting a centralised risk management and improving risk culture in diverse divisions. CDC will also publish quarterly reports on the risk appetite of its investment strategy, including indicators and risk tolerance thresholds, subject to CDC’s supervisory board’s approval and ACPR’s monitoring.

CDC’s asset quality has historically been robust. Most of its assets are bonds, stocks and participations, a mix that reflects its role as a prominent institutional investor. Loans represent a minimal amount on the balance sheet of CDC’s general division, chiefly concentrated on ACOSS and SFIL (as well as the Saving Fund, which is out of the consolidated perimeter). Corporate loans remain on its balance sheet, but they are not meaningful, and impaired loans are minimal.

Credit risk is concentrated within CDC’s securities portfolios. Investment criteria adopted by CDC are strict, requiring high external ratings, and adherence to selected industry sectors and concentration limits. CDC has no material exposure to toxic assets, such as subprime mortgages, CDOs or MBS.

CDC is exposed to market risk through its extensive securities portfolios. It is exposed to interest rate risk in its available-for-sale securities portfolio, as all securities held to maturity are fixed-rate bonds. CDC’s balance-sheet structure may give rise to significant interest rate gaps, which are not entirely hedged. CDC makes no use of macro hedging instruments, but monitors interest rate gaps and applies stress tests to ensure ranges remain within acceptable limits.

Debt and Liquidity

Debt Profile

CDC has good access to long-term funding in capital markets through a EUR18.5 billion EMTN programme that it uses for issues in foreign currencies. Overall outstanding debt under its EMTN programme was EUR15.5 billion at end-June 2021. CDC has also a EUR1.5 billion Neu MTN programme with an outstanding EUR0.7 billion at end-June 2021. CDC issued a EUR500 million green bond in February 2017 and a EUR500 million sustainable bond in June 2019. Since 2019 it has been issuing EUR500 million of sustainable bonds each year.

The debt amortisation profile displays some peak repayments, which are mostly covered by CDC’s sound liquidity profile.

Sound Liquidity

CDC’s liquidity profile is strong. It has wide access to liquidity through its EUR20 billion Neu CP programme (EUR1.7 billion outstanding at end-September 2021) and EUR30 billion global CP programmes (ECP and USCP; EUR13 billion outstanding at end-2020).

CDC’s liquidity is also enhanced by its equity (available-for-sale) portfolio (EUR21 billion at end-1H21) and its option to mobilise its bond (investment) portfolio.

Off-Balance-Sheet Commitments

The off-balance-sheet commitments of the consolidated CDC group totalled EUR260 billion at end-2020, including EUR115 billion of cross-currency swap from SFIL.

Peer Analysis

CDC compares well with other French state operators, which are equalised with the sovereign’s ratings. ACOSS, Agence Française de Développement (AFD; AA/Negative), EPIC Bpifrance, and Caisse d’Amortissement de la Dette Sociale (CADES ; AA/Negative) are also établissements publics. Differences among GRE scores mainly stem from their assessment on Socio-Political Implications of Default (from ‘Strong’ for AFD and EPIC Bpifrance to ‘Very Strong’ for ACOSS and CADES).

Debt Amortisation

Source: Fitch Ratings, CDC

Internationally, CDC compares well with Cassa depositi e prestiti SpA (CDP; BBB-/Stable) in Italy. CDP issues retails saving products and holds stakes in strategic companies. Its ratings are equalised with the sovereign as the latter guarantees CDP's retails deposits and certificates (ie 85% of its total liabilities) and is strongly linked to CDP (GRE score of '47.5').

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
